SUMMARY

Junior web developer and recent graduate with a Diploma in Multimedia, Web & Video Game Development (IEK AKMI, Thessaloniki). Hands-on experience building full-stack web apps and high-performance marketing sites using Next.js, SvelteKit, Astro, TypeScript, Supabase, and PostgreSQL. Comfortable with multilingual UIs, role-based dashboards, and performance tuning (95+ Lighthouse/PageSpeed) across projects such as sports management systems, construction/architecture portfolios, and luxury e-commerce demos.

EDUCATION

Diploma in Multimedia, Web & Video Game Development

Graduated July 2025

IEK AKMI, Thessaloniki

Relevant coursework: Algorithms & Data Structures, Programming Languages, Computer Architecture & Operating Systems,

Development Tools & Application Creation, Databases, Communications, Image Processing (Photoshop)

TECHNICAL SKILLS

Frontend: Next.js, React, SvelteKit, Svelte, Astro, TypeScript, JavaScript, Tailwind CSS

Backend: Supabase, PostgreSQL, REST APIs, Server-Side Rendering (SSR), basic Laravel/PHP

Tools & Workflow: Git, GitHub, Docker (dev), ESLint, Prettier / Biome, VS Code

Design: Photoshop

Languages: Greek (Native), English (C2)

PROFESSIONAL EXPERIENCE

Web Development Intern

Oct 2024 - May 2025

- Built 5+ responsive client websites using WordPress and Next.js, focusing on clean layouts and mobile-first design.
- Developed full-stack features with Supabase (auth + database) and role-based access for internal dashboards.
- Implemented multilingual UIs (Greek/English) with i18n libraries and optional dark mode for better accessibility.
- Optimized performance and SEO (image optimization, caching, SSR), achieving 95+ Google Lighthouse/PageSpeed scores on key projects

PROJECTS

ClubOS – Sports Facility Management System (formerly ProteasApp)

SvelteKit, Svelte 5, Supabase, Tailwind CSS

- Rebuilt my internship warehouse/booking system as a modern multi-role web app for sports clubs (admin, staff, secretary).
- Implemented POS, inventory, register sessions, party and football-field bookings with real-time Supabase updates and RLS.
- Added bilingual UI, dark mode, and strict TypeScript/a11y tooling (Svelte runes, Vitest, Biome).

AUREUS & ARGENT – Luxury Pawnshop Platform

SvelteKit, TypeScript, Tailwind CSS

- Built a premium bilingual landing site with real-time gold/silver price calculator and interactive store locator map.
- Implemented smooth scrolling, micro-animations, and dark/light themes while keeping load times under 3 seconds.

APEX Construction – Construction & Architecture Website (derived from Argicon.gr)

Astro, TypeScript, Tailwind CSS, Resend, Leaflet

- Designed a bilingual, SEO-optimized marketing site for a construction/architecture studio with an image-driven projects gallery.
- Built a rate-limited contact API using Resend and integrated an interactive Leaflet map for office/location details.
- Refactored the original Argicon client site into a reusable Astro template with 95+ Lighthouse scores.

DesignDash.gr - Architecture Portfolio

Astro, TypeScript, Tailwind CSS, GSAP, Zod

- Developed a modern bilingual portfolio for an architecture studio with scroll-triggered GSAP animations and responsive galleries.
- Implemented a validated contact form (Zod + honeypot) and prefix-based routing for Greek/English.
- Optimized for performance with static generation, minimal client-side JS, and compressed media assets.

FeedbackFlow AI – Feedback Analytics Micro-SaaS

Next.js (App Router), Neon Postgres, Drizzle ORM, Auth.js, Tailwind CSS

- Created an automated pipeline that ingests public feedback (e.g. GitHub issues), runs LLM analysis, and stores sentiment/topics/severity.
- Built a secure dashboard with filters, charts, and cron-driven daily ingest so product teams can triage high-impact feedback.
